DETAILED ACTION

Deposit

1. Claims 4 and 5 are rejected under 35 U.S.C. § 112, first paragraph, as failing to provide an adequate written description of the invention and failing to provide an enabling disclosure, because the specification does not provide evidence that the claimed biological materials are (1) known and readily available to the public; (2) reproducible from a written description (e.g. sequenced); or (3) deposited.

Claims 4 and 5 are drawn to monoclonal antibodies, namely 13G3 and 4E10 for determining feline blood type. It is unclear if cell lines which produce antibodies having the exact chemical identity and properties of the antibodies designated 13G3 and 4E10 are known and publicly *available*, or can be reproducibly isolated without undue experimentation. Accordingly, filing of evidence of the reproducible production of the cell lines and antibodies necessary to practice the instant invention or filing of evidence of deposit is required. Without a publicly available deposit of the above cell lines, one of skill in the art could not be assured of the ability to practice the invention as claimed. *Exact replication* of: the claimed cell line; the cell lines which produce the chemically and functionally distinct antibodies claimed; and/or, the claimed antibody's amino acid or nucleic acid sequence is an unpredictable event.

Without a publicly available deposit of the above cell line, one of ordinary skill in the art could not be assured of the ability to practice the invention as claimed. *Exact replication* of: (1) the claimed cell line; (2) a cell line which produces the chemically and functionally distinct antibody claimed; and/or (3) the claimed antibody's amino acid or nucleic acid sequence is an unpredictable event. Deposit of the hybridoma would satisfy the enablement requirements of 35 U.S.C. § 112, first paragraph. See, 37 C.F.R. 1.801-1.809.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 11, line 1, "The kit of Claim 11" should be "The kit of claim 10."

Allowable Subject Matter

4. Claims 1-3, 6-18, 22-23 are allowed.

5. The following is an examiner's statement of reasons for allowance: no prior art teaches or suggests determining feline blood type by using two distinct monoclonal antibodies at the same time where each monoclonal antibody recognizes at least one group feline blood specific A antigen. The same techniques were published by the inventors less than a year ago and had been sworn behind. (See Green et al. Comparative Haematology International (2000) 10: 30-37)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
